

JANUS et Cie®

## BEYOND TOPIARY

### Now Featuring Teak at its Most Luxurious

The Konos collection is a comprehensive lounge and dining ensemble expertly crafted in the warm, earthy spirit of Mediterranean living.

Konos is a triumph in precision, materials and construction. The collection's frame is made from the finest, sustainably grown premium teak and hand buffed to achieve its light beautiful sheen and rounded structure a true feat in engineering. Konos's mesh is created from acrylic yarns and natural hemp, allowing it to feel like fabric, but with the strength of a mesh nature and technology woven as one.

Konos bears a Masterpiece designation, meaning it achieves an unparalleled level of excellence. A JANUS et Cie Masterpiece begins with exquisite composition and meticulous detail, and is then rigorously engineered with the finest materials available and masterfully handcrafted employing time-honored traditions.
