

JANUS et Cie®

BEYOND TOPIARY

Travel to Oceania with These Ten New Fabrics

From above, our world reveals dazzling patterns and grooves, both the marks of civilization and the magnificence of natural landscape. Above Australia's islands, this birds-eye view uncovers the magic of unique foliage, ripples in the earth's surface, peaks, valleys, and nature's majesty all combine to form a richly diverse collection of patterns and textures. With nature as a catalyst for creation, we designed ten fabrics inspired by our world as seen from above, and this essential discovery of new perspectives.

The Oceania Collection harmonizes brilliantly with our esteemed offering of high-performance microbe and ultraviolet resistant fabrics.

Available in an exceptional lineup of patterns, textures and colors, JANUS et Cie textiles can be specified with furnishings or sold separately and shipped worldwide to beautifully transform any interior or exterior space. [Click here to read our 2018 Textiles Booklet.](#)
