BEYOND TOPIARY

A Harmonious Collection Inspired by Traditional Woven Drums

With an airy silhouette, the Nexus collection designed by Janice Feldman is characterized by its intricately woven polypropylene rope, constructed in a unique pattern that fosters the appeal of negative space. Inspired by the woven rope of a traditional native drum, Nexus offers a notable composition, a symphony of organic melody.

The collection's signature seat back mimics a basket, delicately reinforced at each intersection of its aluminum frames. Angular legs give Nexus an hourglass shape, another ode to the silhouette of a drum. "I love the intricacy of the Nexus collection," says Feldman. "Each line of rope serves a distinct purpose and brings a beautiful sense of harmony to every piece."

Available in three shades, Cocoa, White Opal, and Gunmetal, the Nexus collection's versatility makes it the perfect addition to any environment, indoors and out. The pieces are as wonderfully suited at home in a country garden as they are adorning the atrium of a hotel or breakfast café.
