BEYOND TOPIARY

By Popular Demand: Lounge Chairs Join the Iconic Forest Collection

Angular die-cuts form the seats and backs of Forest, a mesmerizing series of seating inspired by the captivating phenomenon of light passing through a tree's branches.

Effortlessly durable in extruded and die cast aluminum frames, the beloved collection's new lounge chair is designed with a deep, embracing seat and offered in Forest's vast selection of vibrant finishes from Light Blue to Terracotta. The new lounge chair interprets Forest's distinctive mid-century modern elements and expands the signature tree pattern to a wide shape, while low, angled legs allow for maximum comfort.

The Forest Lounge Chair's sculptural curves, juxtaposed by sharp angles, define it as a functional work of art, while its intriguing design makes it a fascinating outdoor piece, casting beautiful shadows in sunlight.
