BEYOND TOPIARY

Cone II Dining Table Wins Top Honors at Prestigious NYCxDesign Awards

Interior Design and ICFF announced the winners and honorees of the fourth annual NYCxDesign Awards, and the sleek, modern Cone II Dining Table was selected as the winner for the Residential Dining Tables category.

With a focus on outstanding talent and creativity, the awards honor extraordinary products and projects showcased at NYCxDesign, New York City's annual global celebration of over a dozen design disciplines.

The winning Cone II Dining Table is a modern tribute to pure forms and contemporary curves. The dining table and coordinating side table are composed of a polyethylene base and a durable HPL top. The result is a uniquely simple design that exudes subtle sophistication indoors and out.
