BEYOND TOPIARY

Cool Meets Comfort in this Stunning, Innovative Collection Bringing New Life to Time-Honored Techniques

The Tosca collection, designed by Monica Armani for Tribù, reimagines seating options with an oversized braided textile as its main feature. Paired with a powder coated aluminum frame, the material straps, made from a durable foam encased in a strong, weather-resistant synthetic fiber, is handwoven with a stunning overall appearance.

The effect of the braided material is impressive both aesthetically and functionally. Visually, the pieces are unique, bringing a stylish, bold texture to any exterior environment it inhabits. Practically, Tosca's seating collection provides unparalleled comfort without any sacrifice to durability.

With the seating's strong, signature look, Armani opted for contrast when it comes to the tables. Tosca's tables are minimalist with modern lines, made from powder coated aluminum and stone, creating a perfect complement to the lush, textured seating. Both seating and tables come in a light and a dark finish.
