BEYOND TOPIARY

Introducing the Newest Finish for the Iconic Amari Collection: Smoke

Timeless, masterfully produced, and arrestingly beautiful, the Amari collection remains one of our most prolific, beloved ensembles. Designed by Janice Feldman, Amari now welcomes an enigmatic, elusive new Smoke finish, capturing the true depth of the color greya monochromatic masterpiece that blends light and dark hues to create a variegated gradient. Inspired by its namesake phenomenon, Smoke is a JANUSfiber finish that, once expertly handwoven, embraces Amari's sculptural frames with a careful cadence. The result is luxury outdoor furnishings that double as works of art.

The new finish joins Amari's expansive palette of intriguing JANUSfiber hues, a wide range that captures some of nature's most eloquent pigments: a rich Bronze, a strong Lava, a shimmering Palladium, the earthy Caramel and Bamboo Green, a crisp-white Nimbus, and a warm Limestone.

The colors are complemented by Amari's iconic formcommanding, with sweeping curves and poignant lines as well as its surface, a textured pattern created by skilled artisans handweaving hundreds of strands across multiple arrangements. Juxtaposing ancient, traditional craft with a uniquely modern shape, Amari is an extraordinary collection that elevates any space, from a high-end resort to a corporate campus rooftop to an elegant residential living room.

Available in eight JANUSfiber finishes, the 32-piece collection makes Amari endlessly adaptable.
