MyPlace is a simple, adaptive, **configurable lounge collection** designed to provide flexibility in lounge environments, activity areas and third spaces within today's environments. Easy-to-rearrange modular furniture supports varying levels of engagement in small, private groups and work areas, as well as larger configurations. Users can create subtle or tight curve layouts with a variety of seating shapes, a single seat lounge chair, two ottomans and two inline laminate tables. Choose from a variety of fabrics and three base options, including concealed glides, wood or plastic feet, or casters. MYPLACE LOUNGE SHAPE ADDITIONS by KI. Circle 716. www.ki.com

SEATING

Paséa delivers a flexible **modular lounge collection** that's designed to support active work postures while providing an extremely comfortable sit. Paséa allows for creation of versatile spaces with its line of soft seats, benches and ottomans configurable in any rectilinear or curvilinear configuration possible. A durable polymer base also holds up to frequent cleaning and harsh chemicals. All seats and benches are designed with comfort-scaled seat and back for optimal comfort for those who want to relax and those who want to work. PASÉA by SITONIT. Circle 717. www.sitonit.net

The Bon Vivant Poufs can be used as **seating or side tables**. A firm body allows users to utilize the pieces as a table, and its foam makeup is comfortable as a perch. The reticulated foam body allows for maximum water drainage and air circulation for quick drying. Bon Vivant's removable crocheted exterior makes each pouf easy to clean, and the interior is shielded by a protectant that lets it shed water during outdoor use. Available in four finishes and two sizes. BON VIVANT POUF by JANUS ET CIE. Circle 718. www.janusetcie.com

Angie Seating offers a **comfortable seat** no matter the requirements—from the standard four legs, to sled, spider legs, and even a three-seater bench configuration, Angie is well suited for any space. The curved back and flowing arm rests offer an almost natural feel. Angie's sturdy and durable polypropylene/fiberglass shell allow it to be placed in conference rooms, offices, waiting areas and outdoor spaces. An upholstered seat pad is also available for indoor use. Choose from a variety of tones for the shell and base. ANGIE SEATING by PETER PEPPER PRODUCTS. Circle 719. www.peterpepper.com

TECHNOLOGY SUPPORT

Connectrac Flex enables workspaces to be as flexible and agile as today's workforce demands. Spaces easily adapt to current needs by **delivering power, data and AV connectivity** where it's needed. Employees, students and visitors all expect to "plug in" wherever they are in a building, but that building space must also be agile enough to be used for more than one purpose. Designers and building managers can put electrical receptacles in convenient spots, then remove the receptacles and put a flat cap over the wireway when the space has to be reconfigured. CONNECTRAC FLEX by CONNECTRAC. Circle 720. www.connectrac.com

Bobrick's new B-635 Klutch Mobile Device Holder alleviates concerns about setting electronics on wet counters and elsewhere, **keeping mobile devices safe, clean and secure**. The clip gently comes to rest against the user's mobile device after it's inserted, keeping it in place. Due to its easy installation, it is suitable for toilet compartments, common spaces and private areas where hygienic storage is desired. Its integrated bag hook holds up to 300 pounds. Klutch is also ADA-compliant, requiring no grasping or twisting of the wrist to operate. KLUTCH MOBILE DEVICE HOLDER by BOBRICK WASHROOM EQUIPMENT. Circle 721. www.bobrick.com
