who: Koleksiyon
what: U.S. debut and reception
where: space 7-1130

when: 4:00-6:00PM
who: OFS Brands
what: Showroom party
where: space 1132

SELECT

There's always too much to see—and too little time! For a lowdown on NeoCon's edgiest products, make a beeline for the Interior Design SELECT partner showrooms. For locations, see page 80. #idnecon

greener pastures

Creating restful breakout zones is a walk in the park—er, on the Park—with this latest offering from **Shaw Contract Group's** EcoWorx Resilient line of low-VOC, PVC-free planks. The collection, which also includes carpet tile and broadloom, encompasses subtle riffs on natural motifs and textures (think tree bark, stepping stones, flowing water). Earthy colorways confer a reenergizing vibe that further boosts well-being. Juxtapose two patterns to establish gathering spots in open-plan spaces and circulation corridors—and then kick back. **space 10-167**

the tizzy over izzy+

Gawkers are flocking to check out **Sylvi**, a buzzy debut from **Izzy+**. Designer Joey Ruiters sleek modular lounge seating fulfills every workspace need: Use it to create quick touch-down spots or quiet focus areas. The clean-lined metal frames boast hidden USB and power plug-ins, which are both recessed into a channel designed to accept side tables, magazine racks, and coat hooks. And step back: The frames can even be outfitted with privacy panels to carve out semi-enclosed seating nooks. **space 11-100**

Hi-fi meets low-fi—and cool collections commingle—in Haworth's new showroom design by Patricia Urquiola. Flip to page 2 for more...

Are you a tree-hugger? Well then, head straight to ICF, space 365, to catch Lovi, a birch-plywood facsimile of the real thing.

say hi to alex

For an ultra-durable polyester with an organic feel, look no further than **Alex**. The nubby Trevira CS basket weave from **Création Baumann** has a thick, soft, and decidedly wool-like hand. Even better, the versatile fabric is offered in 50 colors, including one-tone solids and beautifully mottled hues whose sense of depth derives from a cross-dyed foundation weave. Best of all, Alex can be applied to almost any setting: drapery, upholstery, and even wall panels. Through Carnegie. **space 10-112**

3RD FLOOR

janus et cie

SPACE 3-107

Coming soon to an employee café near you. The **Strauss** armchair was inspired by Hans Wegner's Wishbone, but this version is in polypropylene and can be stacked eight high. It comes in Persimmon, Anthracite, Black, Greige, Olive, and Plum, and in an armless side-chair model. Both styles can be used indoors or out.
