Our products incorporate deceptively simple, aesthetically-pleasing designs which minimize environmental impact through timeless design, material selection, and rugged construction. Frightened by today's throw-away society, where products designed for the lowest possible initial cost barely make it home from the store before breaking? Our designs allow products to last for many generations, providing the lowest cost of ownership over time and reducing the impact on our environment. Designed for simple assembly, our products can be easily repaired and refinished instead of tossed away.
