Right: Architect and general contractor Carlos Figueroa created a covered loggia furnished with wicker peacock chairs and a Serena & Lily garden stool on concrete-cement flooring. The cushions on the chairs and the built-in bench—designed to offer more seating without blocking the garden view—are from Wall Boutique.

Opposite: A thriving bougainvillea tree injects a vibrant fuchsia shade in the patio, where a Janus et Cie table and chairs rest on pavers by Madison Construction Group. La Casona Garden designed and installed the landscape.
