ESTHEC >

High-quality stylish design and incredibly durable: these key words precisely define Esthec Terrace. Esthec's high-performance composite decking is easy to maintain, feels incredibly comfortable underfoot and is 100 per cent recyclable, so very sustainable. Esthec Terrace is available in seven colours, providing unprecedented design possibilities, and the colour nuances give the decking a natural and, most importantly, luxurious effect. Since it is made from natural materials, the terrace material does not warp like PVC or wood. For all these reasons, Esthec Terrace is regularly used for terraces of high-end hotels, resorts and beach clubs throughout the world. Esthec Terrace is one of the innovative products of Esthec.

JANUS ET CIE >

Duo collection

A new standard in design and value, Duo achieves excellence in contemporary hospitality and contract furnishings, while giving clients an extraordinary return on investment.

Designed by Feldman's outstanding product development team at JANUS et Cie's design studio, Duo took first place in Seating Group or Series: Outdoor with its Duo Cabana. The stunning Cabana, Daybed and pedestal Cafe Tables are among collection standouts. Inventive and unprecedented, Duo was created in response to clients' request for a design-forward, yet price-conscious collection that serves multiple uses with creative sensibility. The pieces allow for easy mix-and-match in a variety of finish and material options, providing any outdoor setting a modern, tailored design.

Vino collection

Luxurious and visually alluring, VINO takes its name from its generous shape. Janice Feldman, president of JANUS et Cie, the leading source for innovative indoor and outdoor design, calls the expanded collection "the perfect pairing." "These tables and seating make for delightful companions - and years of enjoyment. Like a fine wine and cheese pairing, the pieces are full in shape, and the open weave allows them to breathe in perfect form," she says.

The VINO Dining Table is covered with a solid, round marble slab top with a special seal to withstand the elements. The smooth top creates a natural contrast and perfect balance with the textured form of the base and can be paired with many chairs from JANUS et Cie's other collections including the Wing Armchair.

CARAVITA >

Caravita's Big Ben presents itself as a multifunctional and extremely robust parasol for hospitality. In the wind tunnel testing this professional parasol resists even stormy winds of up to 100km/h for its 3x3m version! Available in many sizes, Big Ben is suitable for large terraces as well as narrow outdoor areas or small cafes. Optional extras such as gutters, side walls, advertising prints and integrated lighting and heating systems make the Big Ben a multifunctional genius.
